

MEET THE MEMBER

Scandinavian Steel AB

IIMA main contact: Peter Witz, Vice-President

HQ location: Stockholm, Sweden

Size: 25 people located in Europe and Asia with agents all over the world

Type of IIMA membership: Trader

Quick description of the company:

Founded in 1958, Scandinavian Steel has grown to become a leading distributor of ferrous and non-ferrous metals, pig iron and alloys to the steel, foundry and chemical industry on a worldwide basis. Many of our products are used to produce the raw materials which later become vital components in the automotive, aerospace and electronics industries.

Recent interesting news or developments:

In Q1 of 2023, Scandinavian Steel signed a MOU with Greenland Resources for the supply of products such as Molybdenite concentrate, Ferromolybdenum and Molybdenum oxide. The agreement implies a provision of Molybdenum products from a primary mine in an Associate EU country, which sets the table for a supply with high ESG standards for decades to come. More information can be found in the following press release: [linkedin.com/ScandinavianSteel/GreenlandResources](https://www.linkedin.com/company/ScandinavianSteel/GreenlandResources).

Scandinavian Steel have also signed an offtake MOU with Molten Metals Corp. for the long-term supply of Antimony. The MOU entails a diversification in sourcing Antimony that also promotes high ESG standards through the interesting assets held by Molten Metals Corp. in both Slovakia and Canada. More information can be found in the following press release: [linkedin.com/ScandinavianSteel/MoltenMetalsCorp](https://www.linkedin.com/company/ScandinavianSteel/MoltenMetalsCorp).

Why are you a member of the IIMA / Best thing about being a member of the IIMA:

IIMA provides excellent opportunities for networking and knowledge sharing, which is primarily exemplified by its Members' Meetings, where actors in the industry get a chance to meet in-person and share insights and information through meetings, talks and papers.

Additional information:

For a number of years, Peter Witz has been an active key figure at the IIMA, sitting on both the Board and the Executive Committee. He is also the chair of the communications committee which seeks to promote the use of ore-based metallurgy in the steelmaking and foundry industries through information and education.
